Dear Mr. Hagen:

Re: Renewal of Operating Permit
for Sanitary Landfill Operation
Gary Development Landfill
Lake County

The review of information submitted in your application for renewal of an operating permit for a sanitary landfill which we received on November 17, 1980, has been completed. The sanitary landfill project, located in that part of the W 1/2 of the SW 1/4 of Section 35 lying north of the Grand Calumet River, T37N, R9W, containing approximately 61.9 acres, was issued a construction plan permit on June 21, 1973. This facility shall be operated in accordance with Rule 330 IAC 4-1, et seq. (Regulation SPC-18), and Construction Plan Permit SW 133.

The above-referenced sanitary landfill project is hereby granted a renewal of Operating Permit No. 45-2, with the following conditions:

1. That sandy, granular material under the unified soil Classification of SW and SP not be used for daily cover.
2. That the clay perimeter seal be compacted to 90% Standard Proctor density.
3. That results of compaction tests conducted on the perimeter seal be submitted to the Division of Land Pollution Control staff within 15 days of completion of the tests.
4. That after each section of leachate collection pipe is installed, it be inspected by a Division of Land Pollution Control staff member before it is covered.
5. That the discharge of water from the site to the Grand Calumet River or other waters of the State of Indiana shall not occur except in conformity with an approved NPDES permit.
